

B727-200 - HP-1939UCG

Paint Scheme Specification

Prepared for:

UniWorld

October 25, 2022

Revision 1: August 31, 2022
Updated sizing and placement of UniWorld logo

Revision 2: October 4, 2022
Dimensions of logo adjusted.

Revision 3: October 11, 2022
Adjusted Wing, Elevator, and Horizontal Stabilizer Colors

Revision 4: October 25, 2022
Changed the door band for the Cargo Door, and added "Baby Rocket"

All dimensions used are only a guide.
Paint shop to determine final
dimensions during the paint scheme
layout.

NOTE:

The design on the right side
of the aircraft is the mirror image
of that on the left side.
Templates should be used to facilitate
the layout from one side to the other.
Similar dimensions apply.

Specification Notes

Dimensions:

Dimensions are in millimeters, unless otherwise specified.

When dimensions are specified with the word "from," it implies the perpendicular distance from where it is measured. For example, "The black stripe starts at a point 1mm **from** the edge of the red stripe" implies that the measurement to the starting point of the black stripe is measured **perpendicular to** the edge of the red stripe.

If a vertical distance is being specified, it will be specified as "**below**" or "**above**" the element from where the measurement is being taken. For example, "The black stripe starts at a point 1mm **below** the edge of the red stripe" implies that the measurement to the starting point of the black stripe is measured **vertically** from the red stripe. Similarly, a **horizontal** measurement (parallel to the ground line) will be specified as "**forward of**" or "**aft of**" a particular reference.

Colors:

Colors are referred to throughout the document by a shortened name. For example, an Acry Glo Black Velvet Metallic color is simply referred to as black. The reference to the actual color against the shortened name is provided on Page 1 of the specifications.

If a different paint type is being used to that specified on page 1, contact Scheme Designers, Inc. directly to determine an appropriate color match in the brand of paint being used.

If there is any reason to suspect an error in a color specification, either in the color name or part number, please contact Scheme Designers, Inc. immediately to verify the color specification.

Paint Masks and Vinyl Decals

The specifications indicate where paint masks and/or vinyl decals are required.

These may be provided by Scheme Designers, Inc., by other paint masks/vinyl decal manufacturers or made internally by the paint shop.

If they are to be ordered from Scheme Designers, Inc.:

Contact Craig Barnett at Scheme Designers to Order.
Phone: 201-569-7785
E-mail: Craig@schemedesigners.com

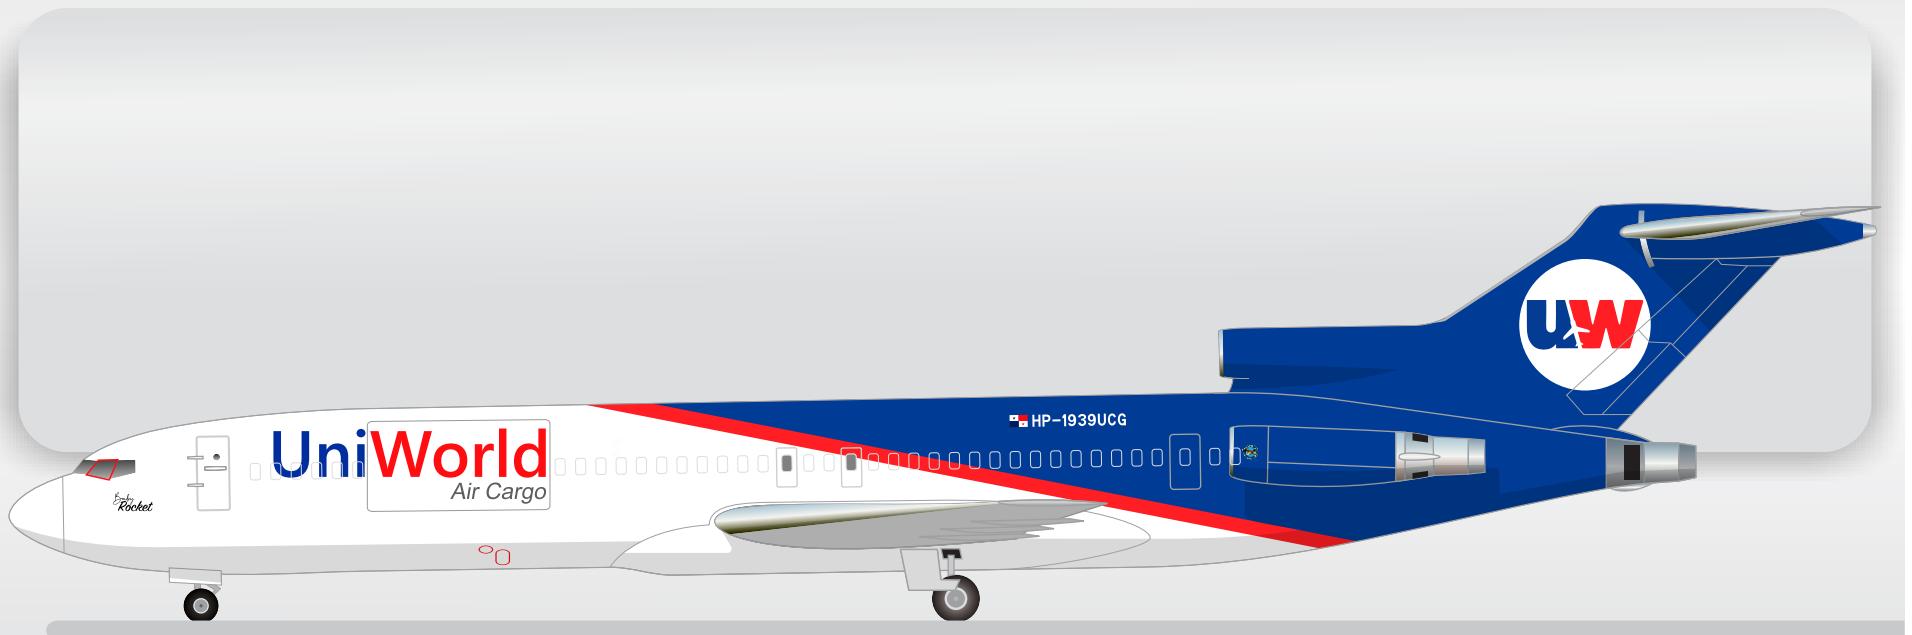

If they are ordered from an alternate source, or made internally:

The drawings in the specifications PDF file are scalable. Extract elements to be paint masked or made into a vinyl decal, scale them to the dimensions indicated in the specifications and proceed to cut. Alternately, the overall length of the aircraft is provided on the cover page. The full drawing of the aircraft can be extracted from the PDF file, enlarged to the overall length provided, and then elements to be paint masked or made into decal can be extracted and cut.

Questions/Errors

While we strive to be as accurate as possible, errors may occur in specifications text or dimensions, or text may be unclear. If an error is found or suspected, or if any item in these specifications is not clearly understood, please call or e-mail Craig at Scheme Designers immediately to resolve the issue or to obtain an explanation.

Alternately, if additional dimensions are required for any purpose, Scheme Designers, Inc. can generally provide those immediately by telephone or e-mail.
